**DECISION UNDER SECTION 37.1(1) OF PIPA**

Based on the information provided by the Organization and given the circumstances of the incident, I have decided that there is a real risk of significant harm to the affected individuals.

A reasonable person would consider the contact, identity, and financial information at issue could be used to cause the significant harms of identity theft, fraud, and financial loss. The likelihood of harm resulting from this incident is increased because the personal information was compromised due to the malicious action of an unknown third party (deliberate intrusion, ransom demand). The lack of evidence that the personal information has been misused is not a mitigating factor, as identity theft and fraud can occur months and even years after a data breach. Further, the information may have been available to the unauthorized third party for approximately 10 days.

I require the Organization to notify the affected individuals whose personal information was collected in Alberta, in accordance with section 19.1 of the *Personal Information Protection Act Regulation* (Regulation).

I understand the Organization notified affected individuals by letter on February 19, 2021, in accordance with the Regulation. The Organization is not required to notify the affected individuals again.
